

Join Austindo Consulting Services and Complete Power Technologies for a dedicated training and engagement day focused on electric drive haul truck systems, with specific content tailored to workshop maintainers and truck electricians.

Whether you're new to electric drive trucks or looking to sharpen your fault-finding skills, this event will boost your confidence and capability.

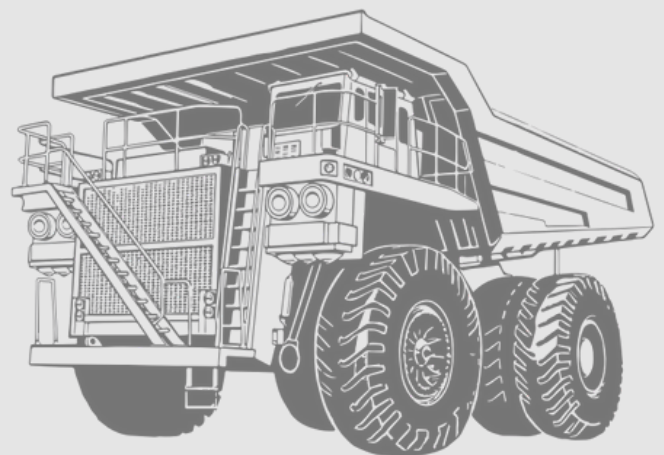

We've taken our AC Drive Overview course and added a maintenance focused twist to create a one day course, covering:

- The principles of AC Drive systems and key components.
- Explore the control system:
 - Excitation and DC Link Regulation.
 - Propulsion and Retard Sequencing and functionality.
 - Basic laptop skills - Troubleshooting, downloading and how to use Our free online resources.
- Common issues and their solutions

Dates: Course #1 - 23rd of September
Course #2 - 24rd of September

Location: Western Gateway Motel,
Emerald QLD

Cost: Reduced to \$250PP for One Time Only
